Exam instructions and bonus exercise set

by Matti Raasakka - Friday, 2 June 2023, 3:47 PM

Hello,

the exam for the quantum info course will take place on Thursday 8th of June at 9:00-12:00 in lecture hall AS1, Maarintie 8. Please, arrive some 10 minutes ahead of time, so that we can start the exam on time.

Here are some instructions for preparing and attending the exam. **Please, read them carefully!**

- 1) We have added the last year's exam and its solutions on the course webpage. You can find the links in the course information under the assignments section, but also here: [exam](#), [solutions](#). You can use the last year's exam to prepare, but obviously your solutions will not be graded.
- 2) In the exam, only writing equipment is allowed. **No calculators.** You can bring some small snack and/or drink with you if you want.
- 3) When you return your solutions, you will be asked to prove your identity. **Bring an ID card with you, which has your photo on it, such as a student card, driver's license or passport.** If you only have an electronic student card on your phone, you can also use that.
- 4) When you arrive at the exam location, leave your bags and other stuff you don't need during the exam on the side of the lecture hall, sit at a free spot in the lecture hall, and wait for the exam to start. (You only need writing equipment and the ID card with you at the table.) **If there are already exam papers on the tables, do not touch them before you are given the permission.**
- 5) After you have finished the exam, check that you have your name and student number on all the answer sheets. Return your solutions to the exam supervisor in front of the lecture hall first, then take your stuff, and exit the lecture hall without disturbing others. Remember to take all of your belongings with you.

Hopefully the exam organization is somewhat clear now. If you have any questions about the exam, don't hesitate to contact us!

BONUS EXERCISE SET: We have also released a [bonus exercise](#) set containing 5 problems under the assignments section, which you can use to cover missing exercise points up to 3p/problem . Note that the maximum total points for exercises are still 90, so you cannot get any extra points if you already have full points. You must return your solutions to the [bonus exercise](#) problems by the 11th of June.

Best of luck with the exam!
-Matti
